RE: Tour of Dayton Electroplate U.S. EPA Site

On Thursday, February 20, 1997, I met with Mr. Steven Renninger, on-scene coordinator, U.S. EPA, at the Dayton Electroplate Superfund site, 1030 Valley Street. The conversation with Steven was quite informative and included a tour of the facility.

The invitation was extended to Company 11 personnel to tour this facility and receive a briefing on the current status of the site rehabilitation which will include a walk-through

Steven asked that you call him at 223-6768 to schedule an appointment for touring the facility.
